Professional Summary

Highly motivated 2nd-year Computer Science student at the University of Information Technology (UIT). Passionate about Artificial Intelligence, specifically focusing on Retrieval-Augmented Generation (RAG) architectures and backend development using Python and FastAPI. Demonstrated ability to build practical AI applications and eager to leverage technical skills in a real-world software engineering or AI internship.

Education

University of Information Technology (UIT) - VNUHCM

Bachelor of Computer Science | GPA: 3.88/4.0

THPT Nguyen Thi Minh Khai

High School Diploma

Aug 2025 – Present

Ho Chi Minh City, Vietnam

Aug 2022 – May 2025

Ho Chi Minh City, Vietnam

Technical Skills

Languages: Python, C++, JavaScript, HTML/CSS, SQL

Backend & Frameworks: FastAPI

DevOps & Tools: Docker, Supabase, Cloudflare Workers/Pages, Google Cloud Run, Git

AI & Automation: Retrieval-Augmented Generation (RAG), FAISS, Ollama, Sentence-Transformers, n8n

Library: Numpy, Pandas, Matplotlib, Seaborn

English: IELTS Academic 6.5

Projects

Data Science UIT 2026 – Legal IR & QA System | Python, Natural Language Processing

Aug 2026 – Present

- **Information Retrieval (IR):** Designed a search system to accurately scan and extract highly relevant clauses from a vast corpus of complex Vietnamese legal documents.
- **Search Optimization:** Enhanced retrieval accuracy by combining exact keyword matching with deep semantic understanding, ensuring the most critical legal articles are prioritized and ranked first.
- **Question Answering (QA):** Built an automated pipeline that analyzes the retrieved legal contexts to synthesize precise, reliable, and strictly referenced answers for complex legal user queries.

Vonika – Personal AI Chat Assistant | Python, FastAPI, Supabase, Cloud Run

Aug 2026

- Built a personal web-based AI chat assistant with a UI layout inspired by NotebookLM.
- Wrote scripts to extract and process text from multiple file formats (PDF, DOCX, XLSX, JSON) to build a local knowledge base.
- Applied basic Retrieval-Augmented Generation (RAG) using FAISS and BM25/TF-IDF to help the AI answer questions.

Pokédex.io – Interactive Web Application | HTML5, CSS3, JavaScript, PokéAPI

Jul 2026

- Developed a web-based encyclopedia allowing users to search and visualize comprehensive Pokémon statistics.
- Engineered dynamic UI components including search autocomplete and evolution chain navigation using Vanilla JavaScript.

Extracurricular Activities

Data Science UIT 2026 Competition

Aug 2026 – Present

Member of Team UIT-VstarK – Legal IR & QA Track

Ho Chi Minh City, Vietnam

Certifications

Crash Course on Python

Apr 2026

Google / Coursera

Gemini Certified Educator

Jan 2026

Google for Education

Data Manipulation and Data Visualization with Python (Score: 8.0)

Sep 2024

Computer Science Center - VNU-HCM

Fundamentals of Python (Score: 7.5)

Jul 2024

Computer Science Center - VNU-HCM

IELTS Academic – Band 6.5

Jan 2024

British Council
